CLEAR TO EXPEDITE SECURITY AT SAN ANTONIO INTERNATIONAL AIRPORT BY SUMMER 2013

CLEAR adds 7th largest US city to its growing, nationwide network

SAN ANTONIO, TX – April 18, 2013-- CLEAR, the leading biometric identity service, announced today that it will launch its expedited traveler services at San Antonio International Airport (SAT) by summer 2013. San Antonio travelers will now be able to speed through airport security in less than 5 minutes on average, bringing speed, predictability and service back to travel.

“We are thrilled to bring CLEAR to San Antonio, one of the fastest growing cities in the US and a major hub for both business and leisure travelers,” said Effie Epstein, Director of Business Development and Strategy at CLEAR. “CLEAR and San Antonio International Airport are aligned in creating the best possible travel experience for San Antonio passengers, and we look forward to welcoming them into the CLEAR network early this summer.”

Two of the top ten most popular destinations from San Antonio (Dallas & Denver) are already CLEAR airports, further driving the powerful network effect for current and future CLEAR members.

“We are always looking for innovative ways to improve airport customer service,” said Aviation Director Frank Miller. “Passengers using the biometric technology can enhance their security checkpoint process and San Antonio airport experience.”

Certified by the Department of Homeland Security as Qualified Anti-Terrorism Technology, CLEAR transforms the travel experience by allowing members to use their biometrics (fingerprint or iris) to speed through security at major US airports. CLEAR membership is only \$179 a year for unlimited use. Members can add their spouse or partner for an additional \$50, and children under 18 always fly free through the CLEAR lane. Military and corporate discounts are also available.
